Dixon Technologies (India) - Q1 FY27 Earnings Conference Call

Moderator: Ladies and gentlemen, welcome to the Dixon Technologies (India) earnings conference call for Q1 FY27.

Managing Director: Q1 margins came in below our expectation because the display module line took longer to stabilise. We are raising our FY27 guidance and now expect revenue growth of 35% to 40% for FY27.

Chief Financial Officer: For the next quarter we expect revenue growth of at least 30% year-on-year, with the festive season build for televisions and phones.

Chief Financial Officer: We expect FY27 EBITDA margin of 3.8% to 4.0%, slightly lower than earlier because of the display start-up costs.

Analyst A: What is the working-capital outlook?

Chief Financial Officer: Working-capital days should stay negative to flat; our customers fund a large part of inventory under the EMS model.

Moderator: That concludes the conference. Thank you for joining.
